RE: Flashing compatibility with Wall Guardian

York Manufacturing has tested both the Flash-Vent SS, Flash-Vent and Multi-Flash copper flashing products with the Wall Guardian air barrier systems. The three flashings are compatible with the FW-100 asphalt based air barrier system. The three flashings are compatible with the FW-100A acrylic air barrier system.

York also approves the use of polyether sealants, like York's UniverSeal US-100 or STS Coatings LT-100, for use with the Flash-Vent SS, Flash-Vent and Multi-Flash flashings. Please contact me if I can answer any additional questions.

Best Regards,
