Description Flexible copper drainage plane flashing composed of a sheet of copper laminated to a polymer backing. The drainage plane fabric is laminated to the outward facing side of the copper. This flashing has a life of the wall warranty. Flexible and easy to form, this flashing is fire resistant and mold resistant. The drainage fabric eliminates the need for mortar netting in cavity walls and does not require an air space to drain the moisture out of your walls.

The HPD Standard is solely a declaration of product content and direct health hazards associated with exposure to its individual contents. It is not a full assessment of environmental impacts from the life cycle of this product. It is not an assessment of risks associated with actual use of the product. It does not address the potential health impacts of substances used or created during manufacture that do not appear in the final product as residuals, nor substances created during combustion or other degradation processes.

This Health Product Declaration was generated following the requirements of the noted Standard version and is valid for a total of three years after date of issue or three months after a substantive change of product contents occurs. Users should verify that this Health Product Declaration is compliant with the most current version of the HPD Standard. Accuracy of claims made in this Health Product Declaration is the sole responsibility of the listed manufacturer and certifier (if applicable). The HPD Collaborative does not warrant any claim made herein, explicit or implicit. The HPD Standard is an “open standard” developed and managed by the HPD Collaborative, a nonprofit organization.
