Weep-Armor™

Description

A free-draining mesh, made from polymer strands that will not degrade within the wall cavity. This wicking fabric is designed to keep weep holes clear of mortar droppings and debris. When placed in the cavity on top of the through-wall flashing at the base of a wall, the Weep-Armor shields and provides water a path to the weep hole vents. Weep-Armor does not oxidize, rot, support mold or fungus, or react with common building materials, including mortar, cement, asphalt, polyurethanes, polyether, silicones, modified bitumen, PVC, copper, steel, or galvanized metal. The material is highly resistant to UV degradation and will not clog with mortar or debris.

WEEP-ARMOR™

DRAWING HAS BEEN EXPANDED FOR CLARITY

Description & Benefits:

- One size fits cavity spacing 1' to 6"
- Keeps weep vents clear of:
 - Mortar dropping
 - Dirt, silt, fines
 - Construction debris
- Prevents insect intrusion
- Mold resistant: passes ASTM D3273
- Fire resistant: passes ASTM E84, Class A
- Life of the wall warranty
- Compatible with:
 - Air barriers
 - Spray Polyurethane Foam
 - Cavity wall insulations
 - Construction sealants

Polymer Strands:

- Made of 93% recycled content
