

Weep-Net™

Protects weep vents from clogging with mortar and debris

Key Properties

- Keeps weep vents clear of:
 - Mortar droppings
 - Construction debris
- Dovetailed design
 - Keeps mortar from blocking water flow to the weep vents
 - Provides structural strength to hold up under normal mortar loads
- No compatibility issues with cavity wall components
- Promotes air flow
- 5' sections available in 1" or 2" depths
- 20 pieces per box

Description

Weep-Net™ is a free draining mesh material that will not degrade in the cavity wall and is made of polymer strands. The dovetailed design are 10" high and the dovetailed slots are 7" deep, which prevent mortar droppings from clogging the weep vents if the material fills the entire air space of the cavity wall.
