As a manufacturer of construction materials, York Manufacturing, does not assume responsibility for errors in design or engineering. Architect or owners representative must verify suitability of details.

**STEP 1**
Install Air/Water Barrier Flashing Membrane at Opening

**STEP 2**
Install Sealant Bed for AirSill™ Type A Receiver

**STEP 3**
Install AirSill™ Type A Receiver

**STEP 4**
Install Fenestration and Perimeter Seals

**NOTE:** The Air/Water Barrier Concealing Leg facilitates direct connection of fenestration perimeter seal and the Air/Water Barrier. Building is dried in.

**STEP 5**
Install Insulation and Cladding

**NOTE:** With building dried in at Step 4, interior construction work can be completed simultaneously with insulation and cladding installation.

**STEP 6**
Install AirSill™ Clip and Metal Flashing

**NOTE:** Seal edge of metal flashing to cladding.

**NOTE:** This sheet provides a general illustration of construction sequencing. Reference the following sheets for additional information:
- AirSill™ Profiles
- Brick Option A
- Brick Option B
- Rainscreen Option A
- Rainscreen Option B
